Christmas Hire

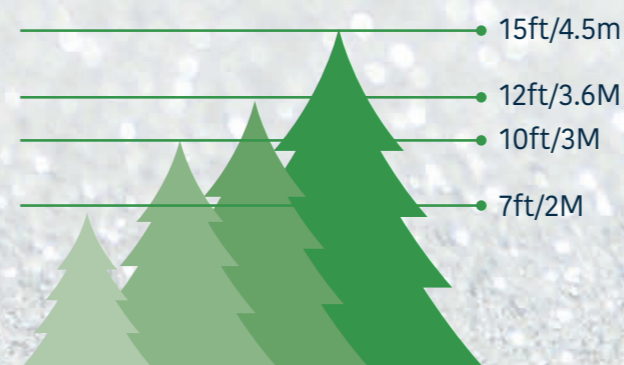

Choosing Flora-tec to supply your Christmas trees and decorations means you can have stylish and professional displays without the hassle of doing it yourselves. Our in-house creative team have designed a range of schemes suitable for all environments.

As well as our pre-designed range, we can also offer a bespoke service tailored to your specific needs.

Quality is something we take very seriously, that's why all of our live trees are sourced from a sustainable grower: every tree cut is replaced by another, sometimes two!

We will carefully install and then remove your display at the end of the seasonal period. We understand Christmas is a busy time of the year so let Flora-tec provide you with a sparkling, festive display for all to enjoy.

Who are we?

Flora-tec is one of the UK's leading horticultural service companies, this means that in addition to supplying our clients with Christmas decorations we also offer the following services: interior planting, grounds maintenance, construction landscaping and winter maintenance including gritting.

Our operatives are fully trained and are supported by a strong management structure.

As we are Safe Contractor accredited, this means we have gone through a robust, independent assessment and therefore can offer our own rigorous health and safety procedures – you can be secure in the knowledge that all work on your site will be safely and legally undertaken.

Operating nationwide, Flora-tec is the reliable, flexible choice for all your horticultural requirements.

Sustainability

Flora-tec is a green company and we take sustainability very seriously, from our products and services right through to how we do business.

We are committed to reducing our impact on the environment.

All our live Christmas trees come from sustainable sources.

For every tree sold a new tree is planted.

We recycle all trees and green waste after collection.

We are ISO14001 accredited, which is an international standard that recognises our commitment to environmentally friendly processes and practices.

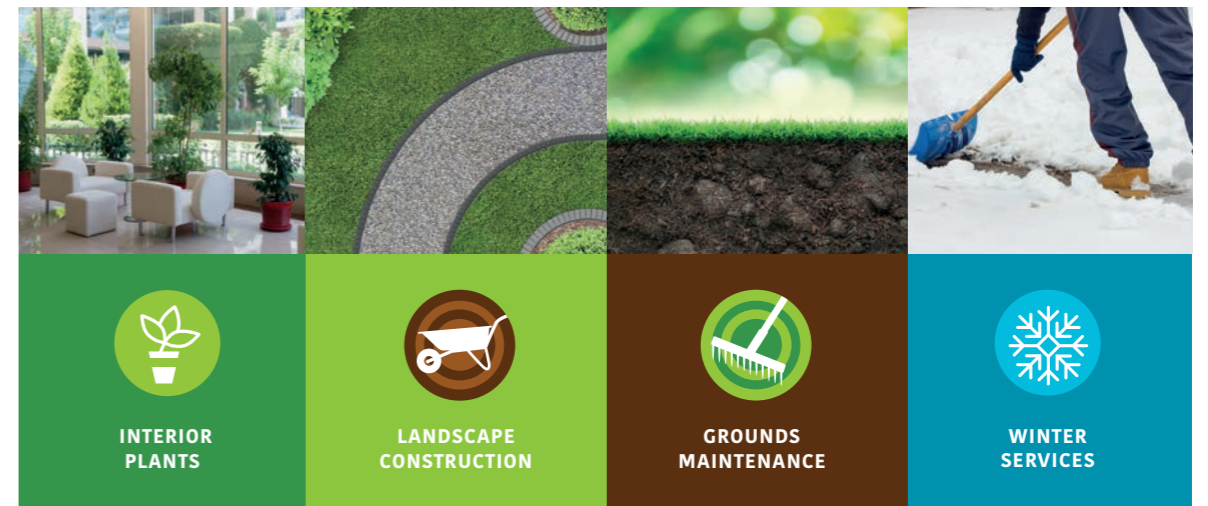

We are constantly striving towards reducing our carbon footprint including making the most economical use of fleet, especially when planning our tree deliveries.

We make every effort to ensure that we consider all possibilities including energy saving LED lighting.

How else can we help you?

Flora-tec can also supply winter maintenance package which comprises of reactive and pro-active gritting and snow clearance services. For more details and to ensure you are prepared this winter please visit our website for more information on any of our services.
